Continuation of 5. does NOT place the application in condition for allowance because: The Kawada et al. reference teaches lamellar liquid crystals. As the applicant has pointed out, "liquid crystals" are not crystalline". See p. 2 of the Response After Final. Therefore, the Kawada reference meets the claimed limitation "an aqueous formulation of at least two lipids in a non-crystalline phase lamellar array". Further, the Applicant's arguments are directed as to whether these lamellar liquid crystals of Kawada et al. will form a crystalline lamellar phase upon application to the skin. In response, it is noted that this limitation is inherent in the prior art because the Kawada's compositions contain the same ingredients as the claimed compositions.
